

# Stack

## Core stack

- **Frontend:** Next.js + TypeScript
- **UI:** Tailwind CSS
- **Backend/API:** Python + FastAPI
- **Database:** PostgreSQL
- **Cache / job queue:** Redis
- **Background jobs:** Celery
- **Containerization:** Docker + Docker Compose
- **Version control:** Git + GitHub

## Security scanning

- **SAST:** Semgrep
- **Secret detection:** Gitleaks
- **Dependency scanning:** Trivy
- **Configuration/IaC scanning:** Checkov
- **Repository analysis:** Tree-sitter / language-specific parsers where needed

## Backend libraries / tooling

- **ORM:** SQLAlchemy
- **Database migrations:** Alembic
- **Validation:** Pydantic
- **Testing:** Pytest
- **API testing:** HTTPX

## DevOps / CI

- **CI/CD:** GitHub Actions
- **Container registry:** GitHub Container Registry
- **Code quality:** Ruff + MyPy
- **Frontend quality:** ESLint + Prettier
